

Paired warm-start distillability evaluation

Evidence map

- 1 Replicated transfer outcomes across corpora**
PTB/WT2 positive, TinyStories negative
- 2 Teacher-state intervention**
same composition, opposite transfer sign
- 3 Weaker-teacher counterexample**
lower held-out teacher likelihood does not preclude positive transfer
- 4 Control falsifications**
TT > TG in the tested control; the tested local diagnostics are not reliable predictors
